(Incorporated)

SALT LAKE AND STATE NEWS

FINDS NEVADA IN PROSPEROUS SHAPE

Salt Lake, Dec. 1.—J. F. Haley, state bullion tax and license agent for the state of Nevada, has completed his trip of official inspection through ten counties of that state, and upon his return to Reno he stated that he had not found one "dead" district in all of his travels. Mr. Haley while in Salt Lake recently on business connected with the Nevada companies organized under the laws of Utah, spoke in enthusiastic terms of the general activity in the mining industry, and expressed a belief that extensive prospecting might open up in western Utah a continuation of the Nevada gold belt.

In speaking of his recent trip, Mr. Haley says: "All sections of Nevada continue to show improvement, and active development work is going on everywhere. In the majority of the counties there are producing mines. The conditions noted are in marked contrast to those that prevailed earlier in the year. More work is being done and better results are rewarding the work. Little is being said and there is no wild-cattling or stock-jobbing operations the speak of, but men are being employed."

"The estimate of an annual production in excess of \$20,000,000 will, I believe, be fulfilled for the state, as there is a recorded increase in production to date of over 100 per cent of former years. The bullion tax collected for the state to date this year is approximately \$175,000, and on the basis of production the record for taxes will be far exceeded."

"There are more miners employed in White Pine county than in any other county in the state," said Mr. Haley, "and a visitor there would be struck with the conviction that the county is on the way to a great era of prosperity. I believe that it is destined to be the center of the copper industry of the world, and it is being developed as fast as men and money can do it. There is an immense field of copper ore there, and it can be handled as economically as anywhere in the country."

During his trip Agent Haley visited Churchill, Humboldt, Lander, Eureka, Elko, White Pine, Lincoln, Clark, Esmeraldo and Nye counties.

SUCCESSFUL FARMERS' INSTITUTE IS HELD

Sandy, Dec. 9.—Another successful farmers' institute, conducted by professors of the Agricultural college, has come to a close. Two sessions were held here today in the city hall. Altogether it has been one of the most instructive and valuable sessions that Sandy farmers have yet experienced. That widespread interest had been manifested throughout the time the body was in session was evidenced from the fact that almost the entire population attended both sessions, and went away with new and more scientific ideas.

A special feature of the event, in contrast from other institutes, was the review and examination of the horses, dairy cows, and sheep of this section of the county. There was a large audience at the morning session to hear the analysis of the characteristics, good and bad, of the cattle and horses that had been brought together for examination. In the examination the professor explained clearly and readily the various merits and defects of the animals. Taken as a whole, it was shown that the stock raisers of this part of the county are doing fairly well in their efforts to get a good class of high-bred stock in every line of animal culture. The many questions asked during the examination and the general interest manifested showed that Sandy has many men who have studied quite carefully many of the phases of stock raising. Mayor W. D. Kuhre was in attendance at both sessions, as were members of the council.

Not only were sheep, cows, pigs and horses discussed in full, but lengthy arguments were advanced on each individual subject. In the lecture on the horse, not only was this animal discussed thoroughly, but a short history was also given.

The day was a big success from every standpoint. The arrangements which had been made by the various committees for the occasion, fitted the niche exactly.

COALVILLE NEWS.

Coalville, Dec. 9.—Thomas Wright, aged 80 years, died here Tuesday morning at 8 o'clock from old age. He was not sick and seemed to pass away as though going to sleep. Deceased was a pioneer of Coalville, having made his home here since the year 1868. He was born in Yorkshire, England, November 21, 1830. He was the father of eleven children, four of whom preceded him in the grave. Beyond his aged wife, seven children, nineteen grandchildren, two brothers and a sister survive him. He was an exemplary man; hard worker, and to his credit it can be said that he was a total abstainer from liquor or medicine of any kind, and knew but little sickness during his entire life time. When it was suggested to him to take some brandy a day or two ago as a stimulant he declined with the statement that he did not want his system poisoned. For thirteen years he was superintendent of the Wasatch coal mine here, now owned by the Weber Coal company, this being one of the first mines opened in this part of the country. Funeral services will be held Friday afternoon from the East Coalville ward meeting house.

At the regular monthly meeting of the county commissioners held yesterday and today somewhat of a surprise was sprung on the native Democrats by Freeman Malin, deputy sheriff, handing in his resignation. It was accepted and J. W. Wilde of this city, who has served in that office for six years, was appointed to the vacancy.

In order to get a more complete assessment of the property next year, the county assessor appointed the following named deputies for the various precincts of the county: Woodland, John Benson; Francis, Marion Corbett; Kamias, Don E. Pack; Marion and Oakley, Seth C. Jones; Peoa, Arthur Maxwell; Rockport, C. A. Horton; Wanship, B. Rigby; Hoytsville, Nepht Sargent; Coalville, W. M. Boyden; Henefor, C. H. Stevens; Echo, R. Wickett; Park City and Parley's Park, John P. Flannigan. These deputies are to receive the sum of \$2 per day and bear their own expense. This is the first time that more than one deputy has been required to make the

assessment of the property in the county.

OPENING AT DEPTH THE OLD IDAHO MINE.

Salt Lake, Dec. 10.—E. F. Fitzhugh, superintendent of the Elkhorn mine on Elk creek, twelve miles northeast of Idaho City, expects soon to strike an ore shoot, and the indications fully justify that expectation, says the Idaho World. He extended the lower tunnel to a point underneath the ore shoot that was worked in early days, and from there began work on a raise, which has cut a ledge ninety-five feet above the tunnel. At that point it is seventy feet wide and solid quartz.

A drift is being driven northwest from the raise and the ledge has been widening from the start. If the shoot should go down straight from the old tunnel above, the drift would now be just about underneath the southeast corner of the Elkhorn mine, and it dips to the northwest, and if it does the drift will have to be extended quite a distance to reach it.

The ledge was struck 150 feet below the old tunnel, from which ore was taken in early days that yielded \$900,000 to a depth of only 100 feet, and 100 feet in length. It is evident that that depth was the limit of the rich ore. If it had not been the old owners would have sunk one the ledge.

In those days when the ore decreased in value the miners quit, condemned the mine, and a common expression then was that "the bottom had fallen out" of it. If they had sunk, it is more than probable that pay ore would again have been struck. It is not reasonable that a ledge that has produced such a great amount of gold near the surface, should contain no pay ore at greater depth.

ELY DISTRICT IS GOOD PRODUCER OF GOLD

Ely Dec. 10.—Ely is known far and wide as producer of copper, but is never considered as a producer of gold. Even Ely people do not realize that as a gold producer it easily ranks fourth in the state, and at the present rate of increase of tonnage it will take third place before the expiration of next year, says the Record.

Official statements of the Nevada Con. show that its ore average 25 cents per ton in gold. A small amount, truly, and yet it amounts to the neat sum of \$1500 daily, \$45,000 per month, or a yearly total of more than a half million dollars from the Nevada Con. alone from its present tonnage, which is being gradually increased each month. Aside from this the ores of the lead belt carry precious metal values ranging from \$15 to \$25 per ton, which with the increased tonnage promised for next year will give the gold output quite a boost.

It now seems probable that with the increased tonnage promised from Copper Flat and the lead belt next year that the gold output of the camp will be close to \$1,000,000, and when the Groux plant goes into commission this amount will be doubled. As regards the ores of that company are known to carry much greater gold values than those of the Nevada Con. The Chairman mill, which will go into commission probably by the first of the coming year, will also materially swell the general average of the camp, for it will be run exclusively on gold ores, averaging from \$10 to \$30 per ton.

RATE FIGHT FROM THE GRAND RIVER VALLEY.

Grand Junction, Colo., Dec. 9.—All large producing mines in Grand River valley will participate in a suit to compel the Denver & Rio Grande railroad to grant coal companies the same ton rate to Salt Lake City that the Rio Grande gives the Sunnyside mines in Utah, according to a statement made today by George Smith of the P. V. mine.

Salt Lake City, Dec. 10.—Present rates on coal from the Sunnyside mines to Salt Lake are approximately \$1.75 a ton for lump coal, but this rate is only nominal, inasmuch as the Utah Fuel company is converting all of the product of the Sunnyside mines into coke, which is marketed in Utah, Nevada, Idaho and Montana. The coal rate from all of the mines in Carbon county varies only a few cents from Castle Gate, which is about 110 miles away. Sunnyside, which is nearly 150 miles from Salt Lake. This rate is regarded as exorbitant from every point of view, and has been the subject of ineffective protests from many sources.

During the last session of the legislature, when some action towards lower coal rates was asked, the railroad representative urged that, inasmuch as Utah could not furnish coal enough for home consumption, the lowering of coal rates would shut Wyoming coal out of the local market and cause a famine. About three months later the Union Pacific and Oregon Short Line advanced the rate on coal from Rock Springs, Wyo., to Salt Lake City 25 cents a ton, using as their argument the fact that Utah was able to furnish all the coal the state needed, and there was no need for a low rate from Wyoming.

Years ago the rate on coal from the Carbon county mines to Salt Lake and Ogden was 75 cents a ton, and during

NOBODY SPARED.

Kidney Trouble, Attack Ogden Men and Women, Old and Young.

Kidney ills seize young and old. Come quickly with little warning. Children suffer in their early years—Can't control the kidney secretion. Girls are languid, nervous, suffer pain. Women worry, can't do daily work. Men have lame and aching backs. The cure for man, woman or child. Is to cure the cause—the kidneys. Doan's Kidney Pills cure sick kidneys. Cure all forms of kidney suffering. Ogden testimony proves it. Mrs. Thomas H. Reeder, 332 22nd St., Ogden, Utah, says: "The public statement I gave for Doan's Kidney Pills in 1906 and 1907 is correct in every detail. I used Doan's Kidney Pills myself and they have been taken by other persons in my home and have always brought relief from pain and soreness in the back and other symptoms of kidney complaint. We always keep Doan's Kidney Pills in the house, procuring our supply from Bardon's Pharmacy, and they have saved us many a doctor bill. I am glad to recommend Doan's Kidney Pills to all sufferers from kidney complaint."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

this time an enormous tonnage was handled, and the old Rio Grande Western paid the only dividend on its common stock which has been paid since the organization of the road.

It is reported on good authority that the Gould and Harriman officials held a conference over coal rates recently, and the question of reducing rates to Salt Lake was discussed at length. The officials of the Union Pacific and Oregon Short Line, however, insisted that if Utah wanted reasonable rates the citizens of the state must force them through the interstate commerce commission.

PARK CITY NOTES.

Park City, Dec. 1.—Frank J. Westcott, secretary of the Silver King Coalition Mining company, came up to the Park from Salt Lake this morning to sign the monthly checks for the King employees.

Colonel Nick Trewick of Salt Lake came up to the Park this morning on business connected with the Wabash mine.

Mr. and Mrs. Henry Welsh returned to their home in Zion yesterday afternoon after spending a few hours in the Park.

A severe blizzard is raging here today, and the wind during the night reached a velocity of about fifty miles an hour. No damage has as yet been reported.

MEAT INSPECTOR RULES.

Salt Lake, Dec. 10.—Continued telephone requests to visit local meat markets to inspect hogs which had been killed in the country and brought here for sale, brought out the positive statement from J. W. Treman, city veterinarian, yesterday that he would not inspect a single hog at a meat market. The veterinarian said farmers had the right to kill hogs themselves, but that they would have to take the carcasses to one of the slaughter houses to be examined and passed upon by one of the city meat inspectors before placed on sale in the city. The inspection will cost nothing, but the hogs must be taken to the slaughter houses where city inspectors are working.

MURRAY NEWS.

Murray, Dec. 9.—Thomas Smith, residing at Midvale, is asking Murray City for damages to the extent of \$7,500, which he alleges he has suffered by riding through Murray with his young son about two weeks ago his horse became frightened at the piles of ties and dirt along State street, dashed down the street, overturning the vehicle in which he was riding, and breaking his ankle. He further states that his ankle will never be the same again and that it is practically useless. He charges negligence on the part of the city officers. He also says that the hour he went through Murray was at 4 o'clock a. m., and that there were no lights put out to point out the dangerous places. The matter has been referred to City Attorney Moffatt.

John Johnson has been appointed by Marshal Mike Mauss of the Murray city constabulary as humane officer at Murray. This office has been vacant for several weeks. Every year the being unable to get anyone to fill the position. Johnson began work today, having filed his bond with the city recorder yesterday morning.

The members of the Murray volunteer fire department will entertain very shortly along extensive lines for the general public. Every year the fire ladders throw upon the fire station for the accommodation of the visitors. This year a general good treat will be in store for the visitors. During the day the members of the department will be on hand to show those who wish it the workings of the various mechanical devices used for fire purposes. In the evening a banquet will be the feature in the gymnasium. A number of the prominent citizens of the city will be in attendance, and several interesting talks will be given and responded to.

ONLY A REPETITION

From Wednesday's Editorial: "The State Veterinary, after applying the tuberculin test, condemned 22 head of cows in the herd of 30 furnishing milk to the Utah State prison, and the animals were slaughtered and buried in quicklime yesterday."

Think of it, 22 cows out of 30? Had these animals been disposed of to uninspected slaughter houses, they would undoubtedly have been put on the market. It makes a meat buyer study. And this is only one of the diseases out of many.

Can you assign any reason why you should lay yourself liable to such infection when the government is annually paying out thousands of dollars in order to protect the public against such meats?

We have the only U. S. Inspected packing plant in the city. All our meats carry the inspection stamp. As a guide for the public we are publishing elsewhere in this paper a list of markets where inspected meats may be purchased. A desire has been expressed to know where inspected meats are handled exclusively. We shall cheerfully furnish the information if you will call us over either phone No. 10.

OGDEN PACKING & PROVISION CO.

BOSTON WOOL.

Boston, Dec. 10.—The erection of a great wool warehouse by western growers and Chicago business men in that city has not threatened the primacy of Boston as the wool market of America and the second largest in the world, according to a statement issued by the Association of Wool Manufacturers today.

The Chicago warehouse recently completed is the outgrowth, it is said, of discontent among some western interests with what are alleged to be arbitrary methods of eastern wool buyers and its purpose is to eliminate the middle men. The national association in its estimate places the number of sheep fit for shearing in the United States at 42,283,205, an increase of 1,981,657 over the preceding year. The wool season of 1909 witnessed a full recovery in prices and volume of business from the financial panic of 1907-08.

The total wool production of the United States this year is estimated at 328,110,749 pounds, an increase of 6,963,137 pounds over last year. The

Miss Rosa Roma, who comes to the Orpheum this (Sunday) evening is described by the papers of other cities as a violin virtuoso and musician of excellence. Her beauty is dilated upon and her skill and technique extolled. She will contribute a series of numbers to the bill. Miss Roma has played over the entire Orpheum circuit except Ogden and Denver. When she fulfills her contract providing for her appearance in these cities she will return to Salt Lake to live. She will also become Mrs. Chester N. Sutton again. She and Mr. Sutton, who is manager of the local Orpheum, were married last August, since which time Miss Roma has been playing the violin in various Orpheums, while Mr. Sutton has been managing first the Butte Orpheum and later the Salt Lake and Ogden houses.

George Bloomquist, one of the great vaudeville successes, will play the Orpheum, beginning this Sunday night, in a sketch that is almost entitled to be called the hit of the year. It is "Nerve," and briefly condensed, it tells of a young civil engineer out of a job, but occupying a suite of offices in a New York skyscraper, the lease on which was the only thing which held him by his father. The president of the railroad wires to hire a civil engineer at \$10,000 a year. The young man induces the railroad magnate to visit him in his offices and then pretends to have plenty of business. When the president calls the youngest is busy with telegrams, phone calls, dictating letters, etc., in which he is assisted by his sweetheart and his friend the janitor. The magnate is so amazed at the remarkable young engineer that he prevails upon him to accept the \$10,000 a year position. It shows that "nerve" will win and Mr. Bloomquist and his company, an old Bloomquist and his company, as the support to the playlet. The support includes Miss Ruby Thorpe, Earl Dwire and Jack Broom.

Martinet and Sylvester have been stirring up a sale of excitement all over the Orpheum circuit. They are knockabout comedians who fall into and out of chairs, tables and other articles of furniture and indulge in a series of bumps that would put an average man in the hospital if he was lucky enough to escape the cemetery. Ballerina's Canine Tumblers are, as their name indicates, of the dog family, but gifted with almost human intelligence and with quite human training. Mr. Ballerina has them so well educated that they are able to perform a series of circus acrobatic stunts, starting in effect. In addition to the dogs there is a cat, which is a special favorite of her master, and which is able to play with her canine associate without peril or noticeable fear. The act has proven exceptional, by pleasing to children elsewhere.

John Birch comes with a novel offering. Alone he plays all the parts of a melodrama. His only change of costume is a change of hats, which, however, suffice. Mr. Birch's act is highly spoken of. Myers and Rosa are lariat experts. They dress in plain clothes as a cowboy and cowgirl, and give an exhibition that is very pleasing. Music by the orchestra and new motion pictures complete the bill.

total value of the wool clip of 1909, as estimated on the price in Boston, is \$88,829,746, as compared with \$61,707,516 for 1908. Total imports of foreign wool for 1909 were 266,409,304 pounds, as compared with 123,980,521 pounds for the year preceding.

The estimated wool production of the world in 1909 was 2,892,986,773 pounds. The production of the world this year, according to the latest official estimate, is 2,804,136,546 pounds—an increase in 14 years of only 111,129,773 pounds. The wool product is not keeping pace with the wool-using population, for the product in 1895 was 4.88 pounds, while now it is 4.27 pounds.
